

PondMAX

WATERGARDENING TO THE MAX

THE PUMP EVOLUTION IS HERE...

evo 
SERIES

SUBMERSIBLE WATER PUMPS

The PondMAX EVOII Range are a revolutionary new range of water pumps.

Features include:

- High Performance with Very Low Power Consumption
- Variable Frequency Motor Design
- Threaded intake to adapt optional sponge pre-filters
- Anti-burnout & Soft Start Technology
- Tool-less Assembly for Easy Maintenance
- Marine & Freshwater Compatible**

Energy Efficient Usage

Save up to \$200.00/year in power consumption with the EVOII Range. Power Saving Costs are an average based on an EV7200 compared to a standard pump and average Australian power prices*.

Saving you on Average
